NWSChat Set-up

National Weather Service

Baltimore/Washington

7 December 2011

WHY NWSChat?

* NWSChat is just another way for our core partners to connect with us

* For EMs and Media

Set-Up

- There is a number of steps to set up account
- Every user has their own accnt
  - NWS Ops staff (Forecasters/HMTs/Interns)
  - Media
  - Ems
- Once set-up, logging in is easy!

Getting Started…

- Open a web browser
- Navigate to:
  - https://nwschat.weather.gov
  - Note that it's https

You are accessing a U.S. Government information system, which includes: 1) this computer, 2) this computer network, 3) all computers connected to this network, and 4) all devices and storage media attached to this network or to a computer on this network. You understand and consent to the following: you may access this information system for authorized use only; you have no reasonable expectation of privacy regarding any communication of data transiting or stored on this information system; at any time and for any lawful Government purpose, the Government may monitor, intercept, and search and seize any communication or data transiting or stored on this information system; and any communications or data transiting or stored on this information system may be disclosed or used for any lawful Government purpose.
NWSChat is an Instant Messaging program utilized by NWS operational personnel to share critical warning decision expertise and other types of significant weather information essential to the NWS's mission of saving lives and property.
This information is exchanged in real-time with the media and emergency response community, who in turn play a key role in communicating the NWS's hazardous weather messages to the public.
NWS partners can use NWSChat as an efficient means of seeking clarifications and enhancements to the communication stream originating from the NWS during a fast-paced significant weather or hydrologic event.
In order to participate in NWSChat, you must meet at least one of the following standards:

In order to use the chat server, you need to have a NWSChat Account. Please fill out the following form to create the account.

1. Agree to Terms

☐ I have read and agree to the terms of use .

2. Requested NWSChat Username (must be lowercase!)

This is your username you will use to log into the chat server. This username is much like an email address, so the same formatting rules apply (no spaces, special characters, etc. and nothing greater than 24 characters)

Option 1: Fill out this form to generate my NWSChat username.

Prefix / Affiliation:	First Name:	Middle Initial (optional):	Last Name:
Please select from list... -	.	.	

Option 2: If you believe the above format does not apply, please email the nwschatadmin@noaa.gov team and explicitly state your NWSChat Username preference.

3. Common Name on Account

This is the name that your account will appear to others as in their Buddy List. You should enter something descriptive of you and your organization. (Nothing greater than 36 characters)

- Include your call letters, if you are media (Ex: kxyz-chief.meteorologist)
- Include your geography, if you are an ema (Ex: fulton-ga-ema-lastname)
- Include your agency and office, if you are government (Ex: faa-memphis-lastname)

4. Contact Email Address

Your current email address is required for account validation, resetting your password, and so we can contact you with NWSChat password expiration reminders and notices. Your email address will not be shared with anyone outside of this project.

the browser from caching important parts of this page.
"NWSChat Live" is a pure web browser instant messaging client for NWSChat. The purpose of the application is to provide users with a painless means to join the NWSChat conversation without installing third party software or worrying about local network firewalls. Since this application runs purely over HTTPS (port 443) and without third party browser plugins, almost all users should be able to run this application without local modifications. The only requirement is for a modern web browser that supports javascript.
This application is under rapid development and may contain bugs. Please report bugs and suggestions to nwschatadmin@noaa.gov. Please be sure to mention the version and brand of web browser you use.

NWSChat Live Application

Most Recent Changes

- 26 Nov: Fixed chatroom message display issues with Internet Explorer. This bug caused messages to appear to be blank from syndicated rooms.
- 6 Nov: Numerous stability improvements. Hopefully make sessions on Internet Explorer 8 more stable and use HTML5 Audio over flash by default when available.
- 9 Aug: Warnings are now presented when users attempt to enter chatrooms twice with the same handle. If you are logged into NWSChat twice and wish to be in the sa chatroom from both clients, you need to use unique handles while in the room.
- 2 Aug: Make another attempt at getting browser-save-login to work and add some code to prevent the browser from caching important parts of this page.
- 22 Jul: Added Storm Prediction Center Days 1 through 3 outlooks.

"NWSChat Live" is a pure web browser instant messaging client for NWSChat. The purpose of the application is to provide users with a painless means to join the NWSChat conversation without installing third party software or worrying about local network firewalls. Since this application runs purely over HTTPS (port 443) and without third party browser plugins, almost all users should be able to run this application without local modifications.
